## FOREWORD

We are pleased to publish "Occupational Diseases in British Columbia" as a new, significant part of the WCB's industrial health and safety program for industry.

This publication reflects the WCB's increasing concern with occupational health and we hope that use of this material will stimulate both thought and positive action concerning industrial disease problems.

We encourage management, labour and industrial health and safety committees to use this information to improve the industrial environment.

A.R. Gibbons
Chairman, Workers' Compensation Board

## INTRODUCTION

This publication presents statistical information on industrial disease claims. The purpose of the publication is to describe the extent and the nature of these claims so that those involved in the prevention of industrial disease can more efficiently direct their efforts. The publication has been produced through the combined efforts of three WCB departments, Occupational Health, Industrial Hygiene and Statistical Services, and Dr. Kaj Husman from the Institute of Occupational Health in Finland.

## DATA BASE

This publication shows statistics on claims for industrial disease that were accepted for wage loss; it does not show statistics on claims that were accepted for medical expense but involved no time lost from work or on claims that were not accepted. Claims with medical expense only represent about 20% of total accepted wage-loss claims, and claims not accepted represent 5-10% of total accepted wage-loss claims in 1978-1982. Diseases that have not been reported to the Board are, of course, also not included in the publication.

The statistics are based on coding of data collected from the claim files of accepted wage-loss claims. In preparation for publishing this booklet, the Board modified the coding system it uses to classify claims, and recoded industrial disease claims that were first paid in the period 1978-1982. It is claims from this period that this publication covers.

According to the Workers' Compensation Act of British Columbia[1], and the Board's Reporter Decision No. 326[2], there are two requirements to be satisfied before a claim for industrial disease is accepted. The first is that the condition is an "industrial disease", which we also refer to as occupational disease in this publication, and the second is that it has been caused by the claimant's work.

Section 1 of Workers' Compensation Act of British Columbia[1] defines industrial disease as "... any disease mentioned in Schedule B and any other disease which the Board by regulation or otherwise may designate or recognize as an industrial disease, and 'disease' includes disablement resulting from exposure to contamination".

Schedule B is shown as Appendix I. It lists a series of diseases and corresponding occupations or industries. If a person has one of the diseases listed in Schedule B, and is employed in the occupation or industry corresponding to the disease, then the Board presumes that the disease was caused by the person's employment[2]. Cases not falling under Schedule B are judged individually on their merit, or by the Board making an appropriate regulation[2].

OTHER DATA

The policy of the Board is to supply information about the claims experience for individual firms to anyone with a direct interest in the occupational health and safety at that firm. This includes members of the safety committee, the management and the union representing the workers at the firm. Requests for statistics on occupational diseases for individual firms should be sent in writing to Statistical Services, Workers' Compensation Board, 6951 Westminster Highway, Richmond, B.C., V7C 1C6.

In addition to the type of information shown in this publication, the Board collects additional information on industrial disease claims, such as occupation, length of exposure, and ICD 9[3] category (since 1981). Anyone interested in the availability of additional information such as this should contact Statistical Services at the above address.

APPENDIX 2

SCHEDULE B

Section 6(4) of Workers' Compensation Act of British Columbia

| Description of Disease | Description of Process or Industry |
|---|---|
| 1. Poisoning by: | |
| (a) Lead | Where there is an exposure to lead or lead compounds. |
| (b) Mercury | Where there is an exposure to mercury or mercury compounds. |
| (c) Arsenic or arsine | Where there is an exposure to arsenic or arsenic compounds. |
| (d) Cadmium | Where there is an exposure to cadmium or cadmium compounds. |
| (e) Manganese | Where there is an exposure to manganese or manganese compounds. |
| (f) Phosphorus, phosphine or due to the anti-cholinesterase action of organic phosphorus compounds | Where there is an exposure to phosphorus compounds. |
| (g) Organic solvents (n-hexane, carbon tetra-chloride, trichloro-ethane, trichloro-ethylene, acetone, benzene, toluene, xylene and others) | Where there is exposure to organic solvents. |
| (h) Carbon monoxide | Where there is exposure to products of combustion, or any other source of carbon monoxide. |
| (i) Hydrogen sulphide | Where there is excessive exposure to hydrogen sulphide. |
| (j) Nitrous fumes (including silofiller's disease) | Where there is excessive exposure to nitrous fumes including the oxides of nitrogen. |
| (k) Nitriles, hydrogen cyanide or its soluble salts | Where there is exposure to chemicals containing -CN group including certain pesticides. |
| (l) Phosgene | Where there is excessive exposure to phosgene including its occurrence as a breakdown product of chlorinated compounds by combustion. |
| (m) Other toxic substances | Where there is exposure to such toxic gases, vapours, mists, fumes or dusts. |

2. Infection caused by:

(a) Psittacosis virus — Where there is established contact with ornithosis-infected avian species or material.

(b) Staphylococcus aureus, Salmonella organisms, Hepatatis B virus — Employment where close and frequent contact with a source or sources of the infection has been established and the employment necessitates:

(1) the treatment, nursing or examination of or interviews with patients or ill persons; or

(2) the analysis or testing of body tissues or fluids; or

(3) research into salmonellae, pathogenic staphylococci or Hepatitis B virus.

(c) Brucella organisms (Undulant fever) — Where there is contact with animals, carcasses or animal by-products.

(d) Tubercle bacillus — Employment where close and frequent contact with a source or sources of tuberculous infection has been established and the employment necessitates:

(1) the treatment, nursing or examination of or interviews with patients or ill persons; or

(2) the analysis or testing of body tissues or fluids; or

(3) research into tuberculosis by a worker who:

(i) when first engaged, or, after an absence from employment of the types mentioned in these regulations for a period of more than one year, when re-engaged in such employment was free from evidence of tuberculosis; and

(ii) continued to be free from evidence of tuberculosis for six months after being so employed (except in primary tuberculosis as proven by a negative tuberculin test at time of employment). In the case of an employee previously compensated for tuberculosis, any subsequent tuberculosis after the disease has become inactive and has remained inactive for a period of three years or more shall not be deemed to have occurred as a result of the original disability for the purpose of the Act, unless the worker is still engaged in employment listed above or the Board is satisfied that the subsequent tuberculosis is the direct result of the tuberculosis for which the worker has been compensated.

| | |
|---|---|
| 3. Pneumoconiosis: | |
| (a) Silicosis | Where there is exposure to airborne silica dust including metalliferous mining and coal mining. |
| (b) Asbestosis | Where there is exposure to airborne asbestos dust. |
| (c) Other penumoconioses | Where there is exposure to the airborne dusts of coal, beryllium, tungsten carbide, aluminum or other dusts known to produce fibrosis of the lungs. |
| 4. Cancer: | |
| (a) Carcinoma of the lung when associated with asbestosis | Where there is exposure to airborne asbestos dust. |
| (b) Mesothelioma (pleural or peritoneal) | Where there is exposure to airborne asbestos dust. |
| (c) Carcinoma of the larynx or pharynx associated with asbestosis | Where there is exposure to airborne asbestos dust. |
| (d) Gastro-intestinal cancer (including all primary cancers associated with the oesophagus, stomach, small bowel, colon, and rectum (excluding the anus), and without regard to the site of the cancer in the gastro-intestinal tract or the histological structure of the cancer) | Where there is exposure to asbestos dust if during the period between the first exposure to asbestos dust and the diagnosis of gastro-intestinal cancer there has been a period of, or periods adding up to, 20 years of continuous exposure to asbestos dust and such exposure represents or is a manifestation of the major component of the occupational activity in which it occurred. |
| (e) Primary cancer of the lung | Where there is prolonged exposure to:<br>(1) aerosols and gases containing arsenic, chromium, nickel or their compounds; or<br>(2) bis(chloromethyl)ether; or<br>(3) the dust of uranium, or radon gas and its decay products; or<br>(4) particulate polycyclic aromatic hydrocarbons. |

| | |
|---|---|
| (f) Leukemia or pre-leukemia | Where there is prolonged exposure to benzene or to ionizing radiation. |
| (g) Primary cancer of the skin | Where there is prolonged contact with coal tar products, arsenic or cutting oils or prolonged exposure to solar ultra-violet light. |
| (h) Primary cancer of the epithelial lining of the urinary bladder, ureter or renal pelvis | Where there is prolonged exposure to beta-naphthylamine, benzidine, or 4-nitrodiphenyl. |
| (i) Primary cancer of the mucous lining of the nose or nasal sinuses | Where there is prolonged exposure to dusts, fumes or mists containing nickel or the dusts of hard woods. |
| (j) Angiosarcoma of the liver | Where there is exposure to vinyl chloride monomer. |
| 5. Heart injury or disease including heart attack, cardiac arrest or arrhythmia, disease of the pericardium, heart muscle or coronary arteries | Where the worker is employed as a firefighter. |
| 6. Asthma | Where there is exposure to:<br>(1) western red cedar dust; or<br>(2) isocyanate vapours or gases; or<br>(3) the dust, fume or vapours of other chemicals or organic material known to cause asthma. |
| 7. Extrinsic allergic alveolitis (including farmers' lung and mushroom workers' lung) | Where there is repeated exposure to respirable organic dusts. |
| 8. Respiratory irritation | Where there is excessive exposure to a gas, vapour, mist, fume or dust of a chemical or other material ordinarily causative of respiratory irritation. |
| 9. Metal fume fever | Where there is exposure to the fume of zinc or other metals. |

| | |
|---|---|
| 10. Fluorosis | Where thee is exposure to high concentrations of fluorine or fluorine compounds in gaseous or particulate form. |
| 11. Neurosensory hearing loss | Where there is prolonged exposure to excessive noise levels. |
| 12. Bursitis | Where there is excessive friction, rubbing or pressure on the bursa involved. |
| 13. Tenosynovitis, tendinitis | Where unaccustomed and repetitive use of the affected arm, hand, leg or foot is required. |
| 14. Decompression sickness | Where there is exposure to increased air pressure. |
| 15. Contact dermatitis | Where there is excessive exposure to irritants, allergens or sensitizers ordinarily causative of dermatitis. |
| 16. Vascular disturbances of the extremities | Where there is prolonged exposure to excessive vibrations at low temperatures. |
| 17. Radiation injury or disease: | |
| (a) Due to ionizing radiation | Where there is exposure to ionizing radiation. |
| (b) Due to non-ionizing radiation: | |
| (i) conjunctivitis, keratitis | Where there is exposure to ultra-violet light. |
| (ii) cataract or other thermal damage to the eye | Where there is excessive exposure to infra-red, microwave or laser radiation. |
| 18. Erosion of incisor teeth | Where there is exposure to acid fumes or mist. |
